FULLSTACK ENGINEER

HTML | CSS | JavaScript | React | Next.js | TypeScript | Tailwind CSS | Shadcn | Node.js | Express.js | Git & Github

Full-Stack Developer with half a decade of experience designing database schemas, building secure RESTful APIs, and delivering scalable SaaS and fintech applications using JavaScript, Node.js, Express, Next.js, and TypeScript. Expertise in authentication & authorization (JWT, HttpOnly cookies, role-based access), compliance-friendly data handling, audit-safe transactions, and system design.

WORK EXPERIENCE

Flospay – Payment Fintech Platform

11/2025 - PRESENT

Frontend Developer

- Built core features for Flospay, a payments platform serving thousands of users with group savings, P2P transfers, and secure payouts.
- Migrated authentication to secure HttpOnly session cookies, eliminating XSS risks and significantly strengthening user trust and regulatory compliance.
- Implemented idempotency keys across all money-movement features, preventing double charges and reducing financial risk while ensuring audit-safe transactions.
- Developed real-time dashboards and transaction systems that improved user engagement and accelerated money movement for the platform.

IGW App(iGaming WriteNow) – iGaming Glossary & Localisation Platform 11/2025 – 01/2026

Full-Stack Developer

- Designed and launched iGW App, a glossary and localisation tool used by iGaming writers, marketers, and brands to create compliant, SEO friendly content.
- Delivered 300+ expert terms with definitions, use cases, and country specific localisation checklists (Nigeria, Ghana, Kenya, South Africa, UK, Canada), helping users reduce compliance risks and expand into new markets safely.

- Built smart search, tagging, Term of the Day, and per-user progress tracking features that increased platform engagement and user retention.

Mahjeq Restaurant Ordering Web App

10/2025 - 01/2026

Full-Stack Developer

- Built Mahjeq, a full-stack restaurant ordering platform used by a live restaurant to manage customer orders, payments, and operations.
- Developed complete ordering system with real-time tracking, admin analytics, and Paystack integration, resulting in 35% improved operational efficiency and higher completed orders.
- Integrated Google Maps, OTP verification, and dynamic order slips, enhancing customer experience and increasing sales.
- Optimized performance with Next.js caching, delivering faster load times and smoother user journeys.

Luxhomes – Property Management Platform

01/2026 – 03/2026

Full-Stack Developer

- Developed Luxhomes, a complete property management platform for hosts and admins in the vacation rental and real estate sector
- Designed RESTful APIs for property management, image uploads, and admin approval workflows, significantly streamlining operations and reducing manual workload.
- Built responsive Admin and Host dashboards with role-based access, real-time updates, and detail sheets, improving productivity for both hosts and platform administrators.
- Implemented server-side protection and optimistic updates, creating a secure, maintainable system that supports scalable real estate operations.

Pharmmar – Pharmaceutical Marketplace Platform

06/2025 – 11/2025

Full-Stack Developer

- Built responsive SaaS landing page and waitlist system that clearly communicated product value, resulting in increased user sign-ups and lead generation.
- Integrated secure backend services for form handling and data storage, improving data accuracy and user trust.
- Designed mobile-first interface that enhanced user engagement and early access conversions for the B2B pharmaceutical platform.

Ajopay – Cooperative Savings Platform

02/2025 – 06/2025

Full-Stack Developer

- Contributing to Ajopay, a cooperative savings (Ajo) platform focused on automated group savings and payouts.
- Designed secure RESTful APIs and relational database schemas, improving transaction reliability and building user trust.
- Implemented JWT authentication and role-based access control, strengthening data security and supporting safe platform growth.

EDUCATION

National Youth Service Corps – 06/2024 – 06/2025

The Federal University of Technology Akure

Bachelor of Science – Building Technology, May 2024

PROFESSIONAL SKILLS

- React, Next.js, TypeScript, Tailwind CSS, shadcn/ui
- Node.js, Express.js, MongoDB, MySQL (Sequelize ORM)
- REST API Integration, TanStack Query, Zustand, Context API, Redux

LANGUAGE COMPETENCIES

- English Language : Fluent
