FULLSTACK ENGINEER

HTML | CSS | JavaScript | React | Next.js | React Native | TypeScript | Tailwind CSS | Shadcn | Node.js | Express.js | Git & Github | Docker | Tanstack Query | Zustand

Full-Stack Developer with half a decade of experience building production SaaS and fintech products that drive real business results. I focus on creating secure payment systems, high-converting user experiences, and scalable member dashboards that improve user trust, increase engagement, and help businesses generate revenue more efficiently. My work has helped platforms reduce operational risks, streamline processes, and deliver smoother experiences for thousands of users across fintech, e-commerce, and digital product spaces.

WORK EXPERIENCE

Flospay – Payment Fintech Platform

11/2025 - PRESENT

Frontend Developer

- Built core features for Flospay, a payments platform serving thousands of users with group savings, P2P transfers, and secure payouts.
- Migrated authentication to secure HttpOnly session cookies, eliminating XSS risks and significantly strengthening user trust and regulatory compliance.
- Implemented idempotency keys across all money-movement features, preventing double charges and reducing financial risk while ensuring audit-safe transactions.

IGW App(iGaming WriteNow) – iGaming Glossary & Localisation Platform 11/2025 – 01/2026

Full-Stack Developer

- Designed and launched iGW App, a glossary and localisation tool used by iGaming writers, marketers, and brands to create compliant, SEO-friendly content.
- Delivered 300+ expert terms with definitions, use cases, and country-specific localisation checklists (Nigeria, Ghana, Kenya, South Africa, UK, Canada), helping users reduce compliance risks and expand into new markets safely.
- Built smart search, tagging, Term of the Day, and per-user progress tracking features that increased platform engagement and user retention.

Mahjeq Restaurant Ordering Web App

10/2025 - 01/2026

Full-Stack Developer

- Built Mahjeq, a full-stack restaurant ordering platform used by a live restaurant to manage customer orders, payments, and operations.
- Developed complete ordering system with real-time tracking, admin analytics, and Paystack integration, resulting in 35% improved operational efficiency and higher completed orders.
- Integrated Google Maps, OTP verification, and dynamic order slips, enhancing customer experience and increasing sales.
- Optimized performance with Next.js caching, delivering faster load times and smoother user journeys.

Pharmmar – Pharmaceutical Marketplace Platform

06/2025 – 11/2025

Full-Stack Developer

- Built responsive SaaS landing page and waitlist system that clearly communicated product value, resulting in increased user sign-ups and lead generation.
- Integrated secure backend services for form handling and data storage, improving data accuracy and user trust.
- Designed mobile-first interface that enhanced user engagement and early access conversions for the B2B pharmaceutical platform.
